

QLW-4【潜油泵过滤器 SUBMERSIBLE PUMP FILTER】

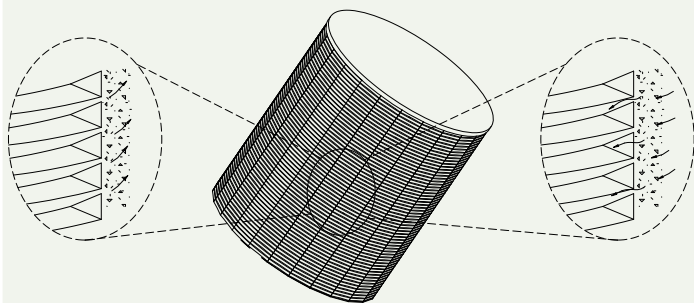

■ 特点

- 0.254mm缝宽;304不锈钢;自我清洁;延长的过滤器使用期;最小的流动限制;
- 泵开启: 过滤器的三角形设计允许流体自由流动, 但阻止颗粒进入流体系统, 而不会降低泵性能。
- 泵关闭: 自清洁设计允许潜油泵关闭时颗粒从进油口脱落
- 解决社会加油站, 卸油时无法加油。

■ Characteristics:

- 0.254mm seam width; 304 stainless steel; Self-cleaning; Extended filter life; Minimal flow restrictions;
- Pump on: The triangular design of the filter allows fluid to flow freely, blocking particles enter the fluid system without degrading pump performance.
- Pump off: Self-cleaning design allows particles to fall out of the oil inlet when the submersible pump is shut down
- Solve the problem of social gas stations being unable to refuel when unloading oil
